FICHES TECHNIQUES

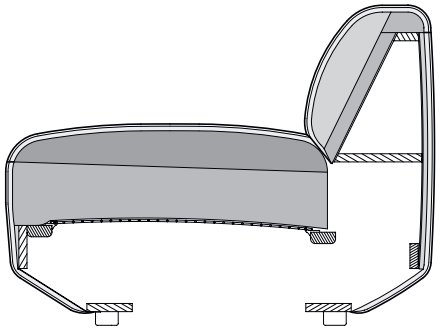

# ROLF BENZ MAVA

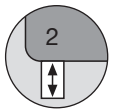

ROLF BENZ

- Structure intérieure en bois
- Suspension à ressorts ondulés de type Nosag
- L‘assise est en mousse froide d‘excellente qualité, couches superposées de hauteurs et densités différentes, qui soulage les points de pression en épousant parfaitement les contours du corps. Sa haute résilience et sa capacité à retrouver rapidement sa forme originale après avoir été compressée sont les deux caractéristiques majeures cette mousse novatrice.
- Dossier en mousse froide d‘excellente qualité, couches superposées de hauteurs et densités différentes.
- Enrobage de dossier en mousse de polyuréthane dans la partie supérieure.
- Revêtement doublé de non-tissé polyester
- Pied en matière synthétique, hauteur au choix 30 ou 50 mm
- Hauteur d’assise au choix 44 cm ou 46 cmv

! Garnissage de grande qualité réalisé avec des matières particulièrement souples, ce qui entraîne l‘apparition caractéristique d‘ondulations / de marques d‘assise après utilisation du siège. Toutes les dimensions indiquées sont approximatives.
