

## Partie technique

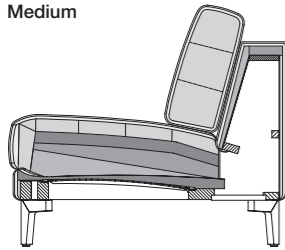

EGO Typ G

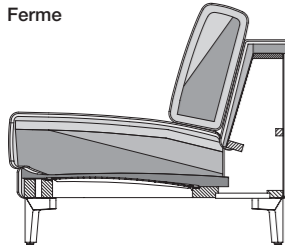

EGO Typ F

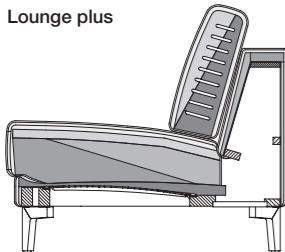

Medium

Ferme

Lounge plus

- Structure intérieure en bois
- Suspension à ressorts ondulés de type Nosag (assise et pouf-banquette sans suspension). Les modèles EPT et PB constituent des exceptions : pour des raisons liées à leur construction, ils nécessitent en effet la mise en œuvre de mousses de polyuréthane de grande qualité.

Même chose pour le modèle PSZ.

- Enrobage d'assise en mousse de polyuréthane
- Enrobage de dossier en mousse de polyuréthane
- Revêtement du bâti doublé de non-tissé polyester
- **Confort « medium » :**
  - › Assise en mousse de polyuréthane, couches superposées de hauteurs et densités différentes, recouverte d'une nappe de type couette, piquage carreaux cloisonnés, et garnie d'un mélange composé de bâtonnets de mousse et de fibres de polyester.
  - › Revêtement de l'assise doublé de non-tissé polyester
  - › Coussin de dossier : Coussins de dossier mobiles, garnissage de type couette, piquage carreaux cloisonnés, constitué de bâtonnets de mousse et de fibres de polyester.
- **Confort « ferme » :**
  - › Assise en mousse de polyuréthane, couches superposées de hauteurs et densités diffé-

rentes, recouverte d'une nappe composite en non-tissé et mousse.

- › Revêtement de l'assise doublé de non-tissé polyester
- › Coussin de dossier : Coussin de dossier en mousse de polyuréthane recouverte d'une nappe composite en non-tissé et mousse.

• **Confort « lounge plus » :**

- › Assise en mousse à froid de grande qualité, garnissage multicouches de hauteurs et densités différentes, enrobage dans une housse de non-tissé polyester.
- › Revêtement de l'assise doublé de non-tissé polyester
- › Coussin de dossier : Coussin de dossier en mousse de polyuréthane recouverte d'une nappe composite en non-tissé et mousse
- Assemblage des éléments composables par garniture suspendue
- Piétement en métal ou en bois, proposé en plusieurs finitions

! Pour des raisons de confort, mais aussi de design, la formation d'ondulations et de d'empreintes d'assise est inévitable, même sur les sièges de très haut de gamme édités par Rolf Benz. Toutes les dimensions indiquées sont susceptibles de varier légèrement.

## Partie technique fauteuil club

EGO Typ G

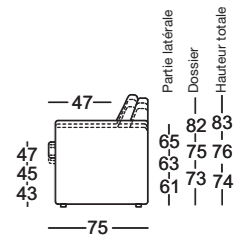

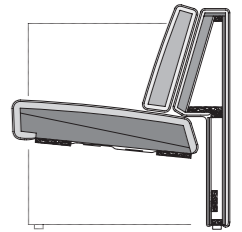

EGO Typ F

- Structure intérieure en bois
- Suspension à lattes souples
- Enrobage de dossier en mousse de polyéther
- Coussins de dossier mobiles : Coussin de dossier en mousse de polyéther, recouverte de non-tissé polyester
- Coussins d'assise **Confort « medium » :** Assise de fermeté moyenne. La superposition de couches de mousse de polyéther de hauteurs et densités différentes assure un confort progressif. Le coussin doit le moelleux de sa surface à un enrobage composite constitué de non-tissé et de mousse. Le confort progressif est obtenu grâce à une technique de garnissage qui garantit à la fois un soutien agréable et une assise moelleuse.

**Confort « ferme » :** Assise assez ferme, assurant un soutien confortable et progressif grâce à

la mise en œuvre de couches de mousse de polyéther présentant divers degrés de fermeté. La surface moelleuse résulte de la mise en œuvre d'une nappe composite en non-tissé et mousse. La technique de garnissage utilisée fait que le corps ne s'enfonce pas dans le siège tout en étant bien soutenu.

- Revêtement du bâti doublé de non-tissé polyester
  - Au choix, patins en matière synthétique, hauteur 12 mm, ou roulettes. Les roulettes augmentent toutes les hauteurs de 3 cm
- ! Pour des raisons de confort, mais aussi de design, la formation d'ondulations et de d'empreintes d'assise est inévitable, même sur les sièges de très haut de gamme édités par Rolf Benz. Toutes les dimensions indiquées sont susceptibles de varier légèrement.

## ASS-PSZ:

Les hauteurs d'assise indiquées sont mesurées à partir du bord avant du coussin d'assise. Les dimensions sont approximatives. Les dimensions du garnissage peuvent varier en raison de l'extensibilité plus ou moins importante des matières de recouvrement, des différences de garnissage et de l'utilisation qui est faite du siège.
